

What is the GAVALUME?

Galvalume™ is a special alloy of steel, aluminum, zinc and silica. It has the strength of the steel, the anti-corrosion of the aluminum side and the other additives are necessary to complement the fact that all of the material has the desired properties. This innovative process protects your outdoor furniture against corrosion.

Why choosing Galvalume?

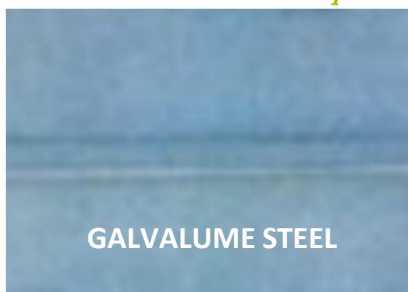

The Galvalume™ is an ideal material for outdoor furniture for the resistance **against corrosion & heat** resulting longevity of incomparable life. In addition, Galvalume™ does not crack when subjected to sunlight and weather and is easy to maintain.

Galvalume versus Galvanized

- Zinc/Aluminium substrate
- Long term: has superior corrosion protection
- No paint peeling
- 5 years warranty
- Zinc only
- Long term: has inferior corrosion protection
- Paint peeling
- No rust warranty

The Galvalume™ ensures protection against corrosion as shown in these two images:

Atmospheric corrosion after 15 years

So the durability life of your furniture Galvalume™ is significantly higher than galvanized.

Features and Benefits

✓ *Corrosion resistance*
✓ *Durability*
✓ *Sturdiness*

✓ *Longevity*
✓ *Resistance*
✓ *Easy maintenance*
